In a focused 4 hour seminar, learn using real projects, plans and bidding documents practical, usable solutions. Hands-on training to use in your business today!

Join us in a collaborative learning framework on the fundamentals of residential and commercial construction plan reading and electronic take-off. At seminar completion, students will demonstrate foundation of knowledge on:

1. Application of electronic systems for commercial construction operations and management
2. Elements of Commercial Drawings and orientation on construction document (blueprint) plan reading.
3. Concepts, methods and techniques for navigating and understanding work requirements
4. Approach and techniques for quantity take offs
5. Elements and approach to organizing an estimating document
6. Application of [QuickEye](#) / Bluebeam electronic take-off and mark-up tools

Possible 4 hours of CCB Continuing Education; Seminar shall be Spanish Friendly

Register NOW as class size is limited..
